Oct. 10

I send you by this mail a copy of Craig's manual in which I have marked the desired corrections to be made in the plates. There are additional genera & species that should be included, & numerous extended corrections that are desirable. While it will be very easy to add four pages of "further additions & corrections", as pages 735a, 735b, 735c, 735d, which will simply necessitate the renumbering of four leaves instead of two as at present?

There should also be on the blank page following the Conducta a "note" respecting the emendations made.

With your approval I will prepare this matter at once for the printers.

I enclose memorandum as to the Revision of the Fish[illegible]

P.P. Calvert
